I am a regional attorney working with Jessica Hernandez, on the San Jacinto Superfund site. Attached is a draft of the document that will be used to designate your clients as EPA's representatives solely for purposes of access to the Big Star property. This designation letter is based on a Headquarters model that we are not at liberty to modify. However, I greatly would appreciate both of you providing the respective signature blocks for your clients so that we may finalize the designations.

Thank you for your assistance. If you have any questions, please call me at 214-665-2169.
